

CSCI 380.61E Web Programming and Interface Design

Part 1

Topic Proposal & Design (Planning Phase)

Objectives

- Form project groups (3–4 members recommended).
- Select a web application topic aligned with course goals.
- Submit a brief background description, user needs, and preliminary interface design.

Deliverables

1. **Group Formation**
 - D2L
2. **Topic Proposal Document (1–2 pages)**
 - **Project Title**
 - **Background / Problem Statement:** What problem or need does your application address?
 - **Objectives:** What will the system do? Who are the users?
 - **Key Features:** List core functionalities.
 - **Proposed Technologies:** React.js for front-end, Hapi.js/Express for API server, MongoDB for database
3. **Design Mockups / Wireframes**
 - Low- or high-fidelity interface sketches (hand-drawn or using tools like Figma or Adobe XD).
 - User flow diagram (optional but encouraged).
4. **Submission:** PDF or Word.
