CSCI 380.61E WEB PROGRAMMING AND INTERFACE DESIGN

MongoDB

Python

CSS

HTML

ReactJS

WELCOME TO WEB PROGRAMMING

Node.js

JavaScript

MySQL

PHP

Angular

Ruby

WHICH WEB PROGRAMMING SKILLS ARE IMPORTANT?

CORE TECHNOLOGIES

HTML CSS JavaScript

CSS PRE-PROCESSORS

Sass Less

JS FRAMEWORKS & LIBRARIES

React Redux Angular Vue Backbone Ember jQuery

TASK RUNNERS

Gulp Grunt

DEPENDENCY & PACKAGE MANAGERS

NPM Yarn Webpack

CSS FRAMEWORKS

Bootstrap Foundation Bulma

MISC TECH

node.js GraphQL

TESTING

Mocha Chai Jest

ADDITIONAL SKILLS

Accessibility
Agile
GitHub & Git
Search Engine Optimization (SEO)

WHO HAS USED GITHUB BEFORE?

- Why do we use GitHub?
- What has GitHub to do with web programming?
- How do you get started with GitHub?
- What could go wrong?

WEB PROGRAMMING COURSE

You will need to code

JavaScript Question - What will the following code output?

```
var a = NaN;  
if ( a === a )  
{  
    alert("a===a");  
}  
else  
{  
    alert("a!==a");  
}
```

WHAT IS THE BEST WAY TO MASTER WEB PROGRAMMING?

PRACTICE, PRACTICE, PRACTICE

Hands-on

Typing examples, experimenting, trying,

WEB-BASED COURSE

- Access to a Browser (Web-Based)
- **Browser** Features
- How does your browser rank?

HTML5TEST IS DEAD

HTML5test is dead. It's been dead for a while. In fact it hasn't been updated since 2016.

And that is fine. This website has served it's purpose and helped popularise HTML5 with a general audience and developers. It pushed companies to invest in their browsers and it kept them honest. And from talking to people working for those companies over the years it worked. It helped convince people higher up to invest more resources, because nobody wants their browser to look bad.

The goal of this website was always to push browsers to adopt HTML5. To make HTML5 available for users and developers in **all browsers**. And if just one feature is now available to developers in all browsers thanks to HTML5test, this website has served it's purpose. And I know for sure that it has served it's purpose. HTML5 is now generally supported and there aren't any truly bad browsers anymore.

I'll try to keep this page online as a snapshot of the original test, and there is an unofficial updated version available at html5test.co.

It was fun to work on this project while it lasted. I have some awesome memories of talking to the people at the W3C, Apple, Mozilla, Google and Microsoft. Thanks for all the support over the years!
